## 1. Curriculum Overview & Statutory Program Foundation

The mandatory establishment of a standardized 24-hour pre-licensing training program represents a critical strategic imperative for the Missouri bail bond and fugitive recovery industry. Operating under the stringent regulatory oversight of the Missouri Department of Commerce and Insurance (DCI), this structured curriculum serves a dual purpose: safeguarding public safety and preserving constitutional civil rights while simultaneously mitigating legal liability for bail bond agencies, general bail bond agents, and surety recovery personnel. In an operational environment where private arrest powers intersect with constitutional protections, comprehensive pre-licensing instruction ensures that entry-level practitioners understand the explicit legal boundaries of their authority.

Standardizing educational benchmarks across statutory compliance, contract law, fiduciary responsibility, and field apprehension tactics establishes a uniform operational standard that minimizes regulatory exposure, prevents costly civil litigation, and fortifies the integrity of the judicial release process across Missouri. Furthermore, statutory frameworks governing credit property and service contract regulations under RSMo Chapter 385 provide critical oversight parameters for commercial financial arrangements and contractual risk transfers associated with bail underwriting and corporate surety operations.

Missouri Bail Bond & Surety Recovery Agent 101, authored by Krystal Allen and Travis Griffin of Griffin Consulting, is designed to address the distinct statutory mandates and operational scopes of the two primary professional recovery tracks licensed by the state. Under Missouri regulatory frameworks, a **Bail Bond Agent** is authorized by the DCI to negotiate and execute bail bonds while concurrently possessing the authority to engage in fugitive recovery operations. In contrast, a **Surety Recovery Agent** operates under a restricted license scope that permits fugitive recovery and bounty hunting activities exclusively, explicitly prohibiting the solicitation, negotiation, or writing of bail bonds. Grounding this curriculum in Missouri statutory frameworks and court rules ensures that

practitioners maintain strict adherence to legal standards governing conditional release, private arrest authority, and collateral management.

|----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Missouri Supreme Court Rule 33</b><br>(33.01–33.20, specifically 33.17) | Supreme Court Rules Governing Right to Release, Rearrest, & Individual Surety Standards | Adhere to judicial release conditions (33.01), execute surrender by surety (33.13), submit motion to set aside forfeiture (33.14), file compensated surety affidavits (33.18–33.19), and verify individual surety eligibility under 33.17 (21+ years old, net assets exceeding exemptions, zero felony/moral turpitude convictions in past 15 years, non-attorney/non-official status). | Ensures contract enforceability in circuit courts, prevents bond invalidation due to unqualified sureties, and establishes procedural immunity during court-ordered rearrests. |
| <b>RSMo Chapter 548</b>                                                    | Uniform Criminal Extradition Act & Cross-Border Recovery Protocols                      | Comply with statutory extradition limitations, interstate fugitive transfer requirements, Governor's Warrants, and cross-border arrest mandates when tracking absconded principals outside Missouri.                                                                                                                                                                                    | Eliminates criminal liability for felony kidnapping or civil liability for unlawful cross-border abductions across state lines.                                                |

|                                                 |                                                                          |                                                                                                                                                                                              |                                                                                                                                                                        |
|-------------------------------------------------|--------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Federal Precedent</b><br>(Taylor v. Taintor) | Federal Common Law Private Jailer Doctrine & Surety Authority Boundaries | Apply common law rights of the surety to custody of the principal, while maintaining strict compliance with modern state statutory restrictions and constitutional use-of-force limitations. | Establishes the foundational legal basis of the surety's contractual arrest authority while establishing legal parameters against unconstitutional or excessive force. |
|-------------------------------------------------|--------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

In addition to the primary licensing and criminal procedure statutes, **RSMo Chapter 385** establishes mandatory regulatory standards for commercial service contracts and credit property arrangements. In the context of bail bond administration, Chapter 385 informs the contractual boundaries of ancillary premium financing, service guarantees, and property security agreements executed alongside principal indemnity contracts. Ensuring that entry-level agents understand the statutory interplay between Chapter 385 commercial protections and Chapter 374 fiduciary mandates prevents deceptive financial practices and guarantees full transparency during contractual execution. A comprehensive understanding of these underlying statutory foundations provides the essential groundwork for systematically analyzing entry-level learner requirements and designing targeted performance objectives in Phase 1.

## 2. Phase 1: Needs Assessment & SMART Performance Objectives

Conducting a rigorous job-task analysis for entry-level bail bond and surety recovery personnel is essential to identify the operational, legal, and safety risks inherent in field operations. Entry-level candidates frequently enter the industry with significant knowledge gaps regarding statutory collateral accounting, court procedures, lawful apprehension boundaries, and administrative compliance protocols. Left unaddressed, these knowledge deficits directly lead to administrative license revocations by the DCI, costly civil lawsuits for false arrest or property damage, personal injury, and operational failure. Conducting a systematic needs assessment allows instructional designers to align pre-licensing instruction directly with state regulatory mandates, bridging knowledge gaps through structured learning domains that emphasize risk management, legal boundaries, and field safety.

To qualify for licensure as a Missouri Bail Bond Agent or Surety Recovery Agent under Department of Commerce and Insurance rules, entry-level candidates must satisfy strict statutory and administrative prerequisites:

**Age Qualification:** Candidates must be at least 21 years of age.

**Citizenship:** Candidates must hold United States citizenship.

**Educational Attainment:** Candidates must possess a valid high school diploma or GED equivalent certificate.

**Fingerprint & Background Check Security Protocol:** Candidates must register with the Missouri Automated Criminal History Site (MACHS) Fingerprint Portal at [machs.mo.gov](https://machs.mo.gov) prior to submitting a license application, referencing the DCI insurance registration number **2955** to ensure compliant criminal history processing.

**Criminal Conviction Disclosure Assessment:** Candidates are not automatically disqualified due to a criminal history, but must fully disclose all criminal history on their application regardless of whether a sentence was actually imposed. Applicants must submit a detailed narrative of

arrest circumstances, original charges, and final convictions, alongside **certified** copies of the Indictment or Information as well as the Judgment and Sentencing disposition documents.

**Licensing Track Authority Contrast:** Applicants seeking licensure as a **Bail Bond Agent** must operate under the authority of a Missouri-licensed General Bail Bond Agent, requiring the submission of a completed and signed General Bail Bond Agent Signature Form (MO375-0112) attached to their main license application packet; this license authorizes both bond writing and fugitive recovery. Conversely, applicants for a **Surety Recovery Agent** license operate under independent authority restricted solely to fugitive recovery, requiring no General Bail Bond Agent signature authorization form, but prohibiting the negotiation or writing of bail bonds.

=====

=====

SMART PERFORMANCE OBJECTIVES MASTER MATRIX

=====

=====

[DOMAIN 1: KNOWLEDGE & STATUTORY COMPLIANCE]

- Objective 1.1: Upon completion of Unit 1, candidates will achieve 100% mastery on formative assessments covering statutory collateral handling per RSMo 374.719, correctly identifying required documentation, receipt formatting, and storage protocols without error.
- Objective 1.2: Candidates will demonstrate cognitive retention of Missouri regulatory statutes by achieving a minimum passing score on the Pearson VUE state licensing examination within one year of completing the 24-hour basic training course.

[DOMAIN 2: PRACTICAL SKILL & FIELD OPERATIONS]

- Objective 2.1: During Phase 2 practical evaluations, candidates will correctly

execute standard law enforcement pre-apprehension notification protocols per

RSMo 324.2184 and RSMo 374.757, successfully completing mock dispatch contact

and identity verification in 100% of practical scenarios.

- Objective 2.2: Candidates will correctly demonstrate standard physical restraint

application (handcuffs, leg chains, belly chains) and search techniques in

accordance with force continuum guidelines and safe transport protocols,

receiving a passing evaluation from certified instructional facilitators.

[DOMAIN 3: PRACTICAL APPLICATION & ADMINISTRATIVE WORKFLOWS]

- Objective 3.1: Candidates will accurately complete all core legal documentation—

including Indemnity Agreements, numbered itemized receipts, Power of Attorney

allocations, and General Bail Bond Affidavits—with 100% compliance and zero

prohibited descriptive errors during practical field simulations.

- Objective 3.2: Candidates will navigate post-licensing maintenance requirements by

outlining the exact process to submit 8 hours of approved continuing education

(CE) on DCI summary forms and filing written change-of-status forms within 30

days of any address or name modification.

=====

Mapping these SMART performance objectives directly against target audience qualifications provides the blueprint for structuring the chronological module architecture and blended instructional strategy in Phase 2.

---

### 3. Phase 2: Design, Blended Strategy & Module Architecture

The 24-hour initial basic training curriculum is structured to maximize cognitive retention and practical skill acquisition over an intensive two-day delivery framework, consisting of 12 instructional hours per day. Utilizing a blended instructional strategy, the program integrates structured textual analysis, interactive scenario-based digital learning, and physical hands-on practicums. Built by Griffin Consulting using eXeLearning, the SCORM-compliant digital framework balances rigorous statutory lecture blocks with reflective case studies and practical physical skill applications. This blended design ensures adult learners transition seamlessly from understanding foundational legal frameworks on Day One to mastering tactical field operations, restraint mechanics, and administrative recordkeeping on Day Two.

#### 24-HOUR INITIAL BASIC TRAINING CURRICULUM ARCHITECTURE

##### DAY ONE: FOUNDATIONS, STATUTORY FRAMEWORKS & BOND PROCESS (12 HOURS TOTAL)

##### I. Bond Process (1 Hour Total) - Discussion & Visual Lecture

##### A. Application for Bond (10 Minutes)

- Comprehensive candidate background screening (minimum 10-year employment history).
- Defendant tracking data collection: past residences, schools, social connections, and immediate family/friend contact mapping for skip-tracing.

##### B. The Surety Contract / Indemnity Agreement (10 Minutes)

- Contractual relationships between surety, defendant (principal), and co-signers.
- Special conditions of release, court appearance obligations, and legal liabilities.

##### C. Obligations of the Parties (10 Minutes)

- Mandatory paperwork walkthrough and explicit risk explanation to co-signers.

#### D. Amount of Bail (5 Minutes)

- Differentiating bail structures: Surety Bond, Cash Bond, Own Recognizance (OR), 10%.

#### E. Collateral Security & Fiduciary Standards (10 Minutes)

- RSMo 374.719 compliance; multi-owner property collateralization.

- Requirement for all property owners to sign indemnity agreements for enforceability.

#### F. Receipts & Valuation Protocol (5 Minutes)

- Mandatory issuance of numbered receipts for all cash and items of value.

- Detailed item descriptions (e.g., "ring, gold in color, with one stone" vs. unverified gemstone claims unless professionally certified); recording damage or defects.

#### G. Posting the Bond & Documentation Recordings (10 Minutes)

- Execution of approved bond sheets at detention facilities.

- Power of Attorney issuance by General Bail Bond Agent; strict prohibition against stacking multiple small powers to meet a single large bond amount.

- Paperwork delivery workflows to court clerks in pending jurisdictions.

## II. Areas of Law & Statutory Frameworks (7 Hours Total)

### A. RSMo Chapter 374: DCI Regulatory Standards (2.5 Hours)

- 374.695 (Citation of Law) & 374.700 (Definitions).
- 374.702 (License required; restrictions on practice).
- 374.705 (DCI Department powers, duties, fee determinations).
- 374.710 & 374.715 (Bail bond agent licensing qualifications, application forms, fees).
- 374.716 (Mandatory accounting, record submissions to Director, principal contract copies).
- 374.717 (Prohibited acts and administrative violations).
- 374.719 (Collateral security handling, mandatory receipts, retention of records).

- 374.720 (Examination formats, content, reexamination fees).
- 374.730 (Biannual license renewal and fees).
- 374.740 (Nonresident license requirements and comity).
- 374.750 (Refusal to issue/renew license; applicant right to hearing).
- 374.755 (Department complaints, disciplinary action grounds, alternate procedures).
- 374.757 (Mandatory pre-apprehension notification to local law enforcement; penalties).
- 374.759 (Access to court records; defendant access to agents; qualification lists).
- 374.760 (Unsatisfied judgments; monthly affidavit filings; form content).
- 374.763 (Collection from surety after forfeiture; circuit court monthly agent lists).
- 374.764 (Alleged violation investigation procedures).
- 374.770 (Bond forfeiture procedures, exceptions, duty of bondsman, rights/obligations).
- 374.775 (Bonds of \$1,000 or less; prohibition of extra fees).
- 374.783 & 374.784 (Surety recovery agent licensing, powers, director authority).
- 374.785 (Permitted apprehension locations and jurisdictional restrictions).
- 374.786 (Renewal procedures for surety recovery agents).
- 374.787 (Complaint procedures).
- 374.788 (Apprehension standards for breach of surety agreement or absconding).
- 374.789 (Prohibited acts for recovery agents; discipline and penalties).

#### B. RSMo Chapter 544: Criminal Code & Court Procedures (2.5 Hours)

- 544.040 (Bail granting by associate circuit judges).
- 544.050, 544.420, 544.490, 544.500, 544.550, 544.570 (Recognizances and dispositions).
- 544.220 (Conveyance of prisoner through adjacent counties).
- 544.230 (Officer immunity from arrest while conveying prisoner; posse authority).

- 544.330 & 544.665 (Failure to appear under recognizance; penalties).

- 544.455 & 544.540 (Conditions imposed upon release; court authority).

- 544.457 (Bail amount considerations; denial under special conditions).

- 544.470 & 544.472 (Commitment procedures; immigration status verification).

- 544.510 (Taking bail when court is not in session).

- 544.520 (Prosecutor name entry on bond).

- 544.580 & 544.590 (Qualification of sureties; security sufficiency).

- 544.600, 544.610, 544.620 (Surrender of principal; bailor liability discharge).

- 544.630 (Other bail provisions).

- 544.640, 544.650, 544.660 (Recognizance forfeiture; writs of scire facias service).

- 544.671 & 544.676 (Bail denials for specified offenses; danger to community).

#### C. Missouri Supreme Court Rule 33 & Constitutional Precedent (2 Hours)

- Rule 33.01-33.06 (Right to release, arrest warrants, release condition modifications).

- Rule 33.08 (Rearrest of accused upon court order or surety motion).

- Rule 33.10-33.11 (Record transmittal, bond filings, cash bond handling).

- Rule 33.13 (Surrender of principal by surety).

- Rule 33.14 (Bond forfeiture procedural notice, entry of judgment, setting aside).

- Rule 33.15-33.16 (Release of obligors, address change notification obligations).

- Rule 33.17 (Individual surety qualification standards; assets, background checks).

- Rule 33.18-33.19 (Compensated surety affidavit of justification; record maintenance).

- Rule 33.20 (Surety company and agent qualification requirements).

- Constitutional Principles: Warrant procedures, incarceration, extraditions, force.

- Federal Common Law: Taylor v. Taintor doctrine and historical surety rights.

### III. Bail Bond Training Part 1 (4 Hours Total)

#### A. Licensing Fundamentals (1 Hour)

- Exam test procedures (10 Min), DCI Regulation (10 Min), Terminology (40 Min).

#### B. Core Legal Documentation (1.5 Hours)

- Power of Attorney allocation and registry.
- Contract elements, classifications, and indemnity enforceability.
- Certifications, revocation of bail, incarceration, surrender, and discharge releases.

#### C. Rights and History of a Bondsman (1.5 Hours)

- Common law origins, historical powers, core principles, and professional practices.

\* Explanatory Pedagogical Note: Placing historical common-law rights and principles

at the conclusion of Day One provides essential conceptual grounding regarding

the private jailer doctrine before students engage in Day Two's high-stakes

tactical apprehension, equipment handling, and field operations.

---

## DAY TWO: ETIQUETTE, FUGITIVE RECOVERY, SKIPS & PRACTICALS (12 HOURS TOTAL)

### III. Bail Bond Training Part 2 (2 Hours Total)

#### D. Business Etiquette & Professional Standards (1 Hour)

- Professional appearance, ethical conduct, client communications, contracts.

#### E. Parties to a Surety Bond (1 Hour)

- Tripartite contract analysis: Principal (Defendant), Obligee (Court), Obligor (Surety).

### IV. Bail Bond Agent & Surety Recovery Training (5 Hours Total)

#### A. Licensing & Regulatory Refresher (1 Hour)

- Examination mechanics, ongoing state regulation, legal terminology mastery.

B. Documentation & Legal Authority (2 Hours)

- Contractual documentation; Warrant execution boundaries, certified bond copies, extradition constraints, incarceration workflows, formal surrender forms.

C. Apprehension Procedures (2 Hours)

- Authority notification; verification techniques, proper use of force continuum, mandatory self-identification, safe custody maintenance, and transport.

V. Bond Forfeitures, Skips & Practical Field Operations (5 Hours Total)

A. Bond Forfeiture Motions & Court Processes (0.5 Hours)

- Responding to court forfeiture motions; notice to surety; legal responsibilities.

B. Uses of Force & Tactical Continuum (0.5 Hours)

- Force continuum application; de-escalation; defensive tactical standards.

C. Self-Identification Standards (0.25 Hours)

- Display of official DCI agent I.D. badges, tactical apparel marking requirements.

D. Advanced Apprehension Techniques (1.25 Hours)

- Apprehension: Certified copies of bonds, local law enforcement notification.

- Tracking: Physical surveillance, OSINT, computer tracking applications.

- Social Media Exploitation: Facebook tracking, legal consent, permissions.

- Operational Equipment Standards: Restraints (handcuffs, leg chains, belly chains), body armor, body-worn cameras, less-than-lethal tools, optics, night vision.

E. Practical Hands-On Field Practicums (1.5 Hours)

- Instructional Mechanics & Physical Execution:
  - Safe double-locking handcuff procedures (speed cuffing, rear wrist application, checking for tightness, double-lock engagement to prevent nerve injury).

- Restraint application mechanics: applying belly chains and leg irons for high-risk transports; maintaining positive physical control throughout fitting.
  - Systematic quadrant search protocols: four-quadrant outer-garment search, weapon and contraband neutralization, pat-down procedures prior to vehicle placement.
  - Safe transport positioning: seating geometry, seatbelt securing without compromising agent safety, continuous monitoring during transit.
  - Real-time form completion: execution of DCI custody transfer forms, jail surrender receipts, and booking intake logs under timed evaluation.
- F. Custody & Legal Liability Management (1 Hour)
- Safe transport rules, duration of custody limits, detention restrictions.
  - Civil/Criminal Liability Mitigation: Official documentation for property damage, personal injury claims prevention, avoiding false arrest liability under 374.789.

To support this module architecture, the eXeLearning SCORM package embeds specific digital learning components to drive engagement and evaluate learning progress:

| eXeLearning<br>Element / iDevice | Pedagogical<br>Function        | Curriculum Application & Compliance Focus                                                                     |
|----------------------------------|--------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Text iDevices</b>             | Structured<br>Content Delivery | Formatted HTML blocks displaying RSMo statutory text, Court Rules, and contractual clauses for legal clarity. |

|                                   |                         |                                                                                                                                                                                           |
|-----------------------------------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Reflective Case Studies</b>    | Scenario Risk Analysis  | Interactive case studies (e.g., Case Studies 1.1–1.4, 2.1–2.4, 3.1–3.2) examining real-world situations like collateral disputes, apprehension force liabilities, and extradition limits. |
| <b>Knowledge Check Quizzes</b>    | Formative Assessment    | Multiple-choice quizzes providing instant feedback and legal rationales to reinforce knowledge retention across each unit.                                                                |
| <b>Custom Visual Infographics</b> | Complex Process Mapping | High-contrast visual diagrams detailing dispatch notification workflows (RSMo 324.2184), cross-border extradition boundaries (RSMo Chapter 548), and biennial renewal processes.          |

Developing these structured digital modules and pedagogical tools provides the framework for producing core content assets in Phase 3.

#### 4. Phase 3: Content Creation, Asset Development & Pedagogical Toolkits

From an Instructional Systems Design (ISD) perspective, establishing standardized media assets and robust pedagogical toolkits is vital to eliminate instructional drift across diverse learning environments. When delivering high-stakes statutory and tactical instruction, variation in content delivery introduces significant compliance risks, potentially exposing future agents and sponsoring agencies to administrative sanctions or civil liability. Standardized instructional assets ensure that every candidate receives identical statutory interpretations, exact procedural templates, and uniform tactical guidelines. By integrating SCORM-compliant interactive digital objects with structured print textbooks and reflective scenario toolkits, the curriculum establishes a rigorous pedagogical foundation that accelerates adult cognitive processing and bridges the gap between statutory theory and field application.

The development of core delivery assets is governed by strict multimedia and design standards:

**Interactive e-Learning Package:** Built using eXeLearning, the SCORM-compliant HTML package delivers an intuitive interface with structured statutory text, interactive case studies, and knowledge checks across all three core instructional units.

**Master Textbook & Slide Decks:** Standardized lecture decks and companion text materials mirror the 24-hour structure across Day One and Day Two, providing comprehensive coverage of RSMo Chapters 374, 385, 544, 548, and Supreme Court Rule 33.

**Reflective Case Study Toolkit:** Integrated across the interactive package, these scenario modules present explicit operational dilemmas and detailed legal analyses:

Unit 1 (Case Studies 1.1–1.4): Focuses on fiduciary collateral management under RSMo 374.719. Specifically, **Case Study 1.1**

analyzes a complex scenario involving real estate pledged as collateral owned jointly by multiple family members. The case study demonstrates that under Missouri contract law and RSMo 374.719, an indemnity agreement is legally unenforceable against non-signing property owners. Candidates must analyze the scenario to verify that all deeded property owners sign the master indemnity contract and receive itemized, numbered receipts, ensuring valid collateral encumbrance and eliminating personal liability for unrecoverable judgments.

Unit 2 (Case Studies 2.1–2.4): Focuses on fugitive recovery, force continuum boundaries, and jurisdictional limits. Specifically, **Case Study 2.3** examines an absconded principal tracked across state lines into Illinois. Candidates must navigate the legal constraints of the Uniform Criminal Extradition Act under RSMo Chapter 548, evaluating why unilateral cross-border force without local law enforcement coordination or formal Governor's Warrant proceedings constitutes felony kidnapping and civil deprivation of rights. **Case Study 2.4** presents a tactical residential entry scenario, forcing candidates to apply the statutory force continuum under RSMo 374.789. Candidates must evaluate forced entry thresholds, identify unconstitutional entry practices, and demonstrate how proper self-identification, pre-apprehension dispatch notification under RSMo 324.2184, and non-deadly de-escalation prevent catastrophic false arrest and property damage lawsuits.

Unit 3 (Case Studies 3.1–3.2): Examines professional ethics, fee-splitting prohibitions, mandatory 30-day DCI change-of-status notifications, and administrative renewal workflows.

**Corporate Visual & Branding Directives:** All course slides, digital modules, and print materials must prominently feature the official course title

Missouri Bail Bond & Surety Recovery Agent 101 and official corporate branding attributed to Griffin Consulting.

**Copyright Protection & Watermarking:** Every custom illustration, workflow diagram, and compliance infographic must display a visible copyright mark: [Griffin Consulting © 2026 Griffin Consulting](#).

**ADA Accessibility Compliance:** Visual assets must feature high-contrast color palettes and full alt-text metadata definitions, supporting accessible screen reader navigation across all digital interfaces.

Assessments are designed to measure candidate progress and prepare them for state licensing requirements:

**Formative Knowledge Checks:** Embedded test modules deliver single-best-answer multiple-choice questions at the end of each section, providing immediate feedback and statutory rationales to reinforce learning.

**Pearson VUE Licensing Exam Alignment:** The curriculum directly aligns with the official licensing examination administered by Pearson VUE (Pearson VUE, Missouri Insurance, P.O. Box 8588, Philadelphia, PA 19101-8588; Telephone: 866-274-4740; Website: [pearsonvue.com](https://www.pearsonvue.com)). Pearson VUE transmits exam results directly to the DCI. Passed exam scores remain valid for exactly one year.

**Military Veterans Examination Fee Reimbursement:** Military veterans sitting for DCI-required state licensing examinations are eligible for full exam fee reimbursement through the Department of Commerce and Insurance, supporting veteran transition into civilian law enforcement and surety recovery fields.

Finalizing these content assets and examination prep toolkits prepares the program for operational deployment and Train-the-Trainer protocols in Phase 4.

---

## 5. Phase 4: Implementation Roadmap, Delivery Logistics & Train-the-Trainer (TTT) Protocols

The execution of a high-stakes compliance and tactical curriculum requires stringent implementation logistics and rigorous Train-the-Trainer (TTT) protocols. Training candidates in physical search mechanics, restraint application, and tactical apprehension introduces significant liability risks if instruction deviates from established legal and safety standards. TTT protocols establish strict facilitator qualification benchmarks and standardized teaching methodologies, ensuring that physical practicums are conducted safely, ethically, and in absolute alignment with Missouri statutes. By controlling instructor credentialing and operational delivery, training organizations mitigate vicarious liability, protect candidate safety during physical drills, and maintain state authorization as an approved basic training provider.

Instructional delivery is restricted to master facilitators possessing verified subject-matter expertise that reflects core industry benchmarks:

**(Lead Instructor & Course Developer):**

**(Co-Instructor & Clinical Education Specialist):**

**Facilitator Practicum Protocols:** Facilitators must actively demonstrate and supervise physical exercises during Day Two's 1.5-hour hands-on practicum. Instructors enforce strict safety standards while coaching candidates through double-locking handcuff application, belly chain and leg iron fitting, systematic four-quadrant searches, safe transport positioning, and real-time execution of formal DCI custody transfer and booking documentation.

=====

=====

[MILESTONE 1: PRE-ENROLLMENT & BACKGROUND REGISTRATION]

- Candidate verifies minimum qualifications: 21+ years old, U.S. citizen, High School diploma or GED equivalent.
- Candidate completes fingerprint registration on the MACHS Fingerprint Portal (machs.mo.gov) using DCI Registration Number 2955.
- Candidate compiles full criminal history documentation (certified Indictments/ Information, Judgments, and Sentencing disposition documents) for full disclosure.

[MILESTONE 2: 24-HOUR INITIAL BASIC TRAINING COMPLETION]

- Candidate completes the intensive 2-day (12 hours/day) course: Missouri Bail Bond & Surety Recovery Agent 101.
- Candidate achieves 100% attendance, passes all formative knowledge checks, and successfully demonstrates physical restraint mechanics and search techniques during Day Two practicals under instructor supervision.
- Training provider issues official 24-Hour Initial Basic Training Certificate (Valid for exactly 1 year from issuance).

[MILESTONE 3: PEARSON VUE STATE LICENSING EXAMINATION]

- Candidate contacts Pearson VUE (866-274-4740 / pearsonvue.com) to obtain Candidate Handbook and schedule examination sitting.
- Military veterans file for examination fee reimbursement through DCI portal.
- Candidate passes exam; Pearson VUE transmits official results directly to DCI. (Exam score valid for exactly 1 year from test date).

[MILESTONE 4: FORMAL DCI LICENSE APPLICATION SUBMISSION]

- Candidate completes main State License Application Packet (Bail Bond / Surety

Recovery Application) and submits \$150 licensure fee payable to DCI Insurance.

- TRACK-SPECIFIC MANDATES:

- Bail Bond Agent Applicants: Must complete and attach the General Bail Bond Agent

- Signature Form (MO375-0112), signed by the supervising General Bail Bond Agent

- under whose authority they will operate. (Grants bond writing & recovery authority).

- Surety Recovery Agent Applicants: Submit independent license application packet

- without Form MO375-0112. (Grants recovery authority ONLY; no bond writing authority).

- Complete application packet must be received by DCI within 1 year of training completion.

=====

=====

Establishing this operational implementation workflow ensures that candidate outcomes can be systematically measured using the Kirkpatrick Evaluation Model in Phase 5.

---

## 6. Phase 5: Kirkpatrick 4-Level Evaluation Master Guide & Continuous Improvement Framework

Applying the Kirkpatrick 4-Level Evaluation Model provides a structured framework for measuring instructional quality, candidate learning, operational compliance, and business outcomes. In a regulated industry, evaluation goes beyond measuring student satisfaction; it must verify that training reduces statutory violations, prevents illegal field practices, and minimizes civil liability for agencies. By tracking candidate performance across all four levels, Griffin Consulting maintains a continuous feedback loop that drives ongoing instructional improvements and aligns coursework with evolving state rules.

### KIRKPATRICK 4-LEVEL EVALUATION SYSTEMATIZATION

#### LEVEL 1: REACTION (Learner Engagement & Course Experience)

- Focus: Evaluates student satisfaction, instructor performance, platform usability, and course clarity.
- Measurement Tools: Post-course digital feedback forms and eXeLearning survey modules.
- Key Metrics: Target 90%+ positive satisfaction rating on course organization, relevance of case studies, visual layout clarity, and instructor subject knowledge.

#### LEVEL 2: LEARNING (Knowledge Acquisition & Skill Mastery)

- Focus: Measures candidate retention of legal statutes and physical skill execution.
- Measurement Tools: Formative SCORM knowledge check quizzes, practical restraint evaluations, and Pearson VUE state examination pass rates.
- Key Metrics: 100% accuracy on statutory collateral handling exercises (RSMo 374.719); 100% proficiency in safe handcuffing mechanics; 85%+ first-time pass rate on the

Pearson VUE state exam.

### LEVEL 3: BEHAVIOR (On-the-Job Field Compliance & Operational Practice)

- Focus: Assesses long-term compliance, field operations, and administrative adherence during active practice.
- Measurement Tools: DCI administrative audit records, field dispatch reports, and biennial license renewal filings.
- Key Metrics:
  - Zero statutory violations for improper collateral accounting or receipts (RSMo 374.719).
  - 100% compliance with pre-apprehension law enforcement dispatch notifications (RSMo 324.2184 & 374.757).
  - Zero complaints or civil judgments for excessive force or false arrest (RSMo 374.789).
  - Timely submission of written address/name change forms to DCI within 30 days.
  - Completion and reporting of 8 continuing education (CE) hours every 2 years using DCI summary forms, avoiding \$25/month late fees.

### LEVEL 4: RESULTS (Organizational Impact & Liability Reduction)

- Focus: Evaluates macro-level operational, legal, and business outcomes for agencies and the judicial system.
- Measurement Tools: Circuit court forfeiture records, civil litigation filings, insurance loss-runs, and DCI enforcement summaries.
- Key Metrics: Significant reduction in bond forfeitures and unrecovered skips; zero civil judgments for property damage or unlawful entry against licensed agents; enhanced professional coordination between recovery agents and law enforcement.

=====

=====

| Kirkpatrick Level        | Evaluation Focus & Target Outcome                                                                         | Data Collection Tool / Metric                                                               | Timing & Governance                                                      |
|--------------------------|-----------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| <b>Level 1: Reaction</b> | Assess candidate satisfaction with eXeLearning interface, textbook materials, and instructor delivery.    | End-of-course survey; digital feedback forms embedded in SCORM package.                     | Immediate (Administered at the conclusion of Day Two).                   |
| <b>Level 2: Learning</b> | Verify cognitive retention of RSMo statutes and practical skill in restraint application.                 | Formative SCORM quizzes; practical physical skill checklists; Pearson VUE exam score feeds. | In-course practicals; state exam sitting (within 1 year of completion).  |
| <b>Level 3: Behavior</b> | Verify on-the-job statutory adherence, law enforcement notifications, and renewal CE filings.             | DCI audit reports; dispatch log verifications; DCI CE Summary Form submissions.             | Ongoing (Evaluated during 2-year renewal cycles and regulatory reviews). |
| <b>Level 4: Results</b>  | Measure enterprise risk reduction, lower bond forfeiture rates, and elimination of false arrest lawsuits. | Circuit court forfeiture filings; civil lawsuit tracking; DCI disciplinary summaries.       | Annual enterprise review & industry impact analysis.                     |

Continuous improvement protocols ensure the curriculum adapts dynamically to legal and administrative changes:

**Annual Statutory & Administrative Review:** The curriculum undergoes an annual compliance audit to incorporate updates from the Missouri Department of Commerce and Insurance, statutory revisions to RSMo

Chapters 374, 385, 544, and 548, and modifications to Supreme Court Rule 33.

**Regulatory Rule Alignment:** Content maintenance tracks regulatory reviews conducted under DCI Division 700 (Insurance Licensing, Chapter 6 - Bail Bond Agents and Surety Recovery Agents, including 20 CSR 700-6.100, 700-6.150, 700-6.160, and 700-6.170) as well as insurer record retention mandates (20 CSR 100-8.040).

**SCORM Digital Package Maintenance:** Digital course files are updated in eXeLearning and submitted through State Based Systems (SBS) via [statebasedsystems.com](https://statebasedsystems.com) or NAIC service channels ([sbshelp@naic.org](mailto:sbshelp@naic.org)), ensuring approved training content remains aligned with state licensing requirements.

This comprehensive 5-phase training, implementation, and evaluation strategy provides a standardized educational framework that elevates professional operational standards, ensures strict statutory compliance, and protects public safety across Missouri's bail bond and surety recovery industry.
